MATERIALS. SYSTEMS. GREEN SPACES.

About MiniJungle

MiniJungle develops soilless growing media and modular greening solutions for a wide range of plant applications.

From plant cultivation to vertical greening systems.

BUILT AROUND XPONGE®

An interconnected pore structure designed to support moisture retention, airflow, and root growth.

We focus on practical materials and modular products that make green spaces easier to create and maintain.

01-02 / SOILLESS GROWING MEDIA

Xponge® Soilless Growing Medium (Series)

XP-ZT / 3 L per bag

Bamboo Charcoal Blend

Clean rooting blend for seedlings, cuttings, and fine-root plants.

SUITABLE PLANTS

Young tropical plants
Young aroids (Araceae)
Begonias (*Begonia* spp.)
Ferns
Rooted cuttings

XP-KL / 3 L per bag

Pure Granules

Base granules for custom substrate blends.

BLENDING GUIDANCE

Can be blended with bark, pumice, lava rock or other growing media as needed.

Interconnected pores balance water and airflow.

Supports moisture retention and healthy root growth.

Lightweight / Clean / Customizable

03 / MODULAR GREENING

JungleFrame® Ultra-Thin Green Wall

Bare Frame

Example Installation

1 cm ultra-thin structure

Standardized modules combine and expand to create green walls for home and commercial spaces.

Modular assembly

Standard simple irrigation

Space-saving design

Shown with plants for application reference only.

BARE FRAME OPTIONS

MJ01-135B	55 × 135 cm	Black, without plants
MJ01-190B	55 × 190 cm	Black, without plants
MJ01-245B	55 × 245 cm	Black, without plants

Dimensions include 25 cm feet. Standard simple irrigation system.

Live plants and on-site installation are not included. Installation guidance is available upon inquiry.

04 / PROJECT MATERIALS

JungleMat® Thin Plant Blanket

SG01-S / Bare Blanket

120 × 140 cm / Black

A thin soilless plant blanket for facades, hoardings, roofs, slopes, and interior green walls.

Three-layer construction provides a protective surface with internal water retention, distribution, and aeration. Lightweight and modular for project use.

THREE-LAYER STRUCTURE

Front: polyester permeable felt

Core:
Xponge® Growing Medium

Back: polyester permeable felt

SYSTEM CONCEPT

Frame + waterproof board + plant blanket + irrigation

Facades

Hoardings

Roofs & Slopes

Interior Green Walls

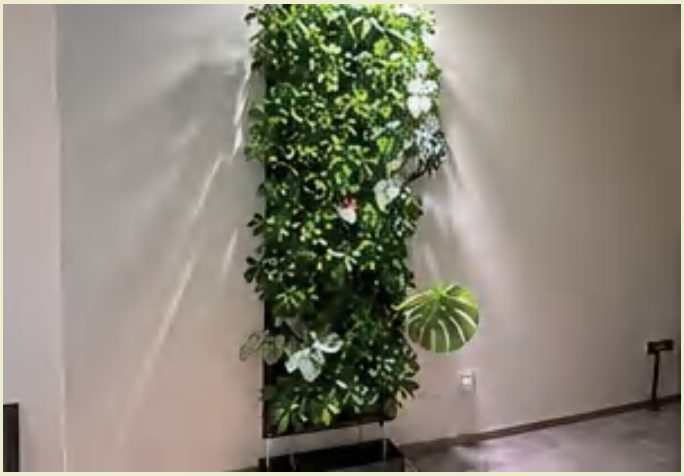

Related framing, waterproofing, and irrigation components are available for project inquiries and are not automatically included with the bare blanket.

Live plants and on-site installation are not included. Installation guidance is available upon inquiry.

GREEN SPACES, AT EVERY SCALE

Applications

Existing application imagery illustrates possible uses; plants and on-site installation are not included.

Home & Interior Spaces

Bring vertical greenery into everyday spaces.

Commercial Environments

Integrate planted surfaces into shared interiors.

Architectural & Vertical Greening

Explore facades, hoardings, roofs, and slopes.

Displays & Public Spaces

Use modular greenery as a spatial focal point.
